Hi! you can call me Matt. I'm a student, artist, programmer, and designer.
I'm currently studying Digital Arts and Design,
and I consider myself a Jack-of-all-trades.

Scroll down to see some of my work!

I'm a Czech student currently living in Ireland. I've always been fascinated by games – from making my own board games since I was a kid, to joining a Games Development course in college. I also loved art – even though not as much. I switched courses in my second year of university to learn more about the creative side of things.

In my spare time I run the college's board game society, or I run, literally. I also like cooking and hiking.

Anyways, enough about me, and more about me! here's some of my past projects.

Clowning Around

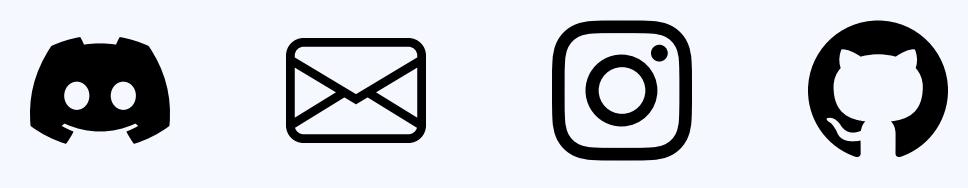

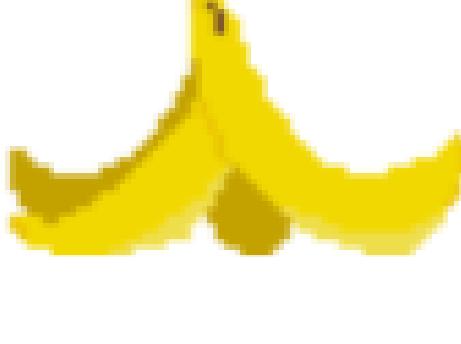

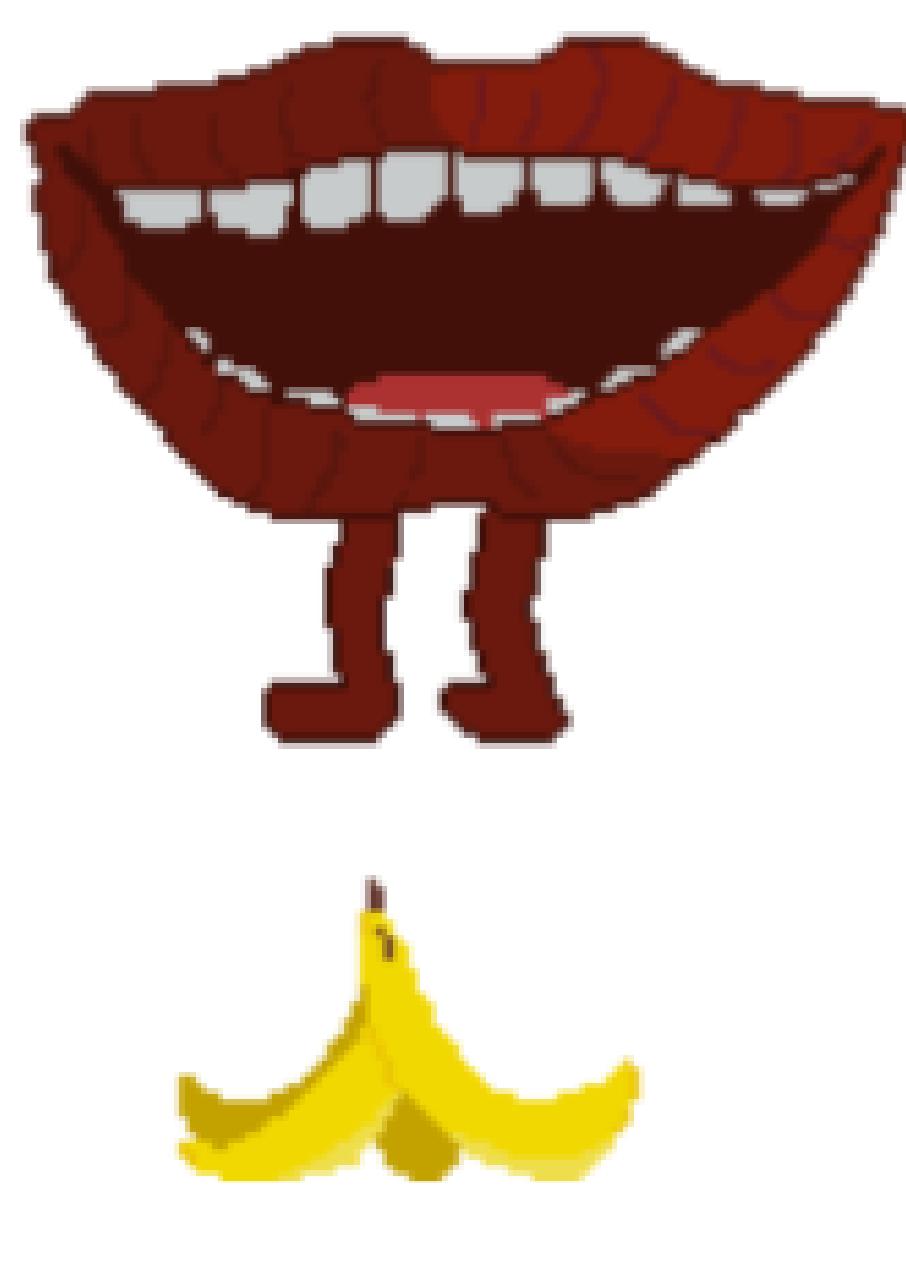

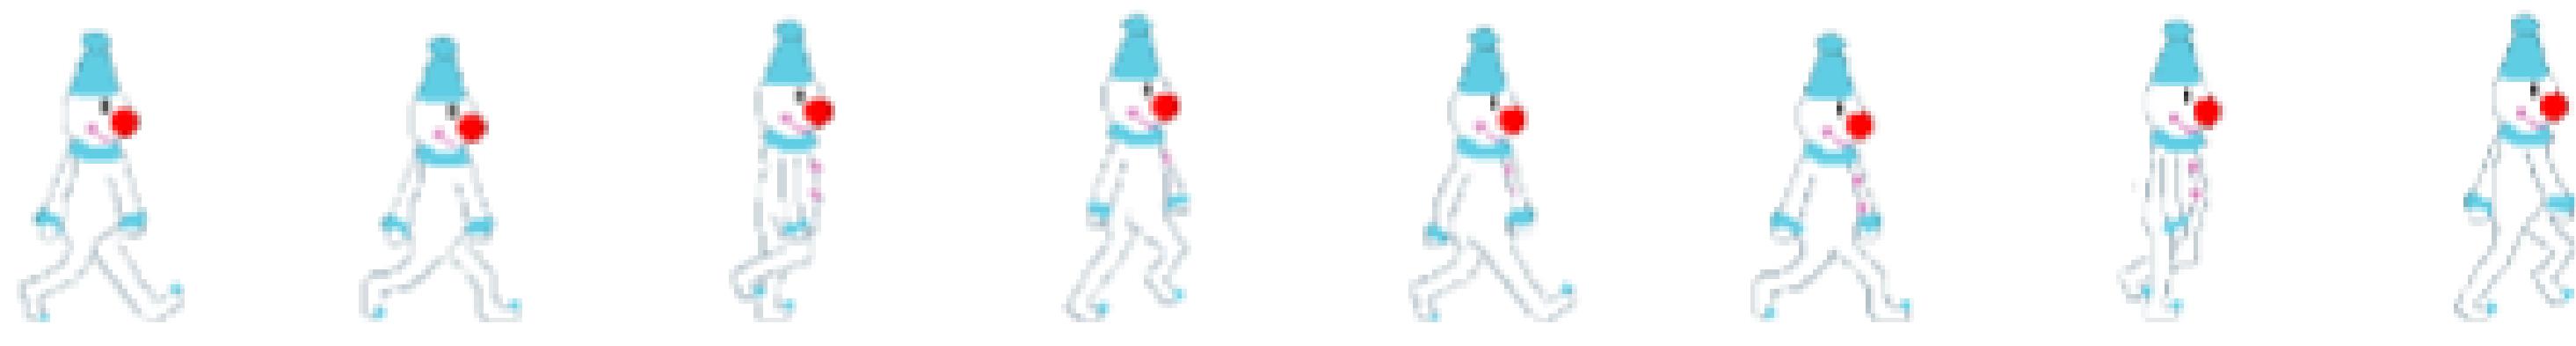

For Global Game Jam 2024, the theme was "make me laugh". I came forward with an idea for a puzzle platformer, where you play as a clown in a circus world. You can make a clown joke (honk your nose) near the resident walking mouths to make them laugh, which creates a physical "HaHa", which can interact with the environment - pop balloons, break platform, etc.

My role on the team was being the Artist and Creative Lead.

Our team ended up winning a "Best use of theme" award at the end of the weekend.

You can check the project out here!
